Harshit Soni

Mumbai, India | +91 8369218446 | iharshsoni@gmail.com | linkedin.com/in/harshit-soni-871798279 | github.com/harshit-soni-2004

Skills

Backend & frontend: Java 21, Spring Boot 3, Spring Cloud (Gateway, Eureka), Spring Security, REST, JPA/Hibernate, Angular, TypeScript

Data & messaging: MySQL, Flyway, Redis, RabbitMQ

Cloud & IaC: AWS (EC2, AMI, EKS, SSM, S3, Lambda, EventBridge, SES, RDS, IAM, VPC), Terraform

DevOps & CI/CD: Docker, Docker Compose, Bitbucket Pipelines, Jenkins, Maven, Git, Linux (AlmaLinux/RHEL, Ubuntu), Bash, Python (boto3)

Security: Trivy, CIS benchmarks, JWT (RSA), Jasypt, vulnerability management, least privilege

Experience

Veefin Mumbai | Apr 26 - Oct 26

Software Engineer, Full-time

- Worked directly with the CTO to design and build an internal task manager for the engineering team, replacing Jira and eliminating its recurring licence cost
- Delivered 76 commits (42 Spring Boot, 34 Angular) on a collateral-management module: lien fields, valuer-expiry rules, save-as-draft flows and validation
- Patched the CIS-hardened AlmaLinux 9 golden AMI (9.4 to 9.8), cutting High/Critical findings from 9,305 to 4,380 and Critical from 7 to 0; wrote the weekly patching runbook
- Built the company's first arm64 (Graviton) hardened AMI and turned it into an Amazon EKS 1.32 worker AMI (containerd, kubelet, nodeadm), root-causing a three-part boot failure
- Stood up a Docker Compose environment for a 15-service Spring Boot platform and recovered Flyway migrations through schema V44
- Deployed applications and worked on CI/CD pipelines (Bitbucket Pipelines, Maven), root-causing failing builds on self-hosted runners
- Wrote reusable Terraform modules (S3, EC2, RDS) enforcing encryption, IMDSv2 and private networking

Internship

TransactBox Mumbai | Jan 26 - Apr 26

Software Developer Intern

- Replaced hardcoded business logic with database-driven configurations using Spring Boot and JPA
- Designed and implemented admin-controlled filter management with REST APIs, enabling real-time updates without redeployment
- Integrated services through Spring Cloud Gateway and Eureka in a microservices architecture
- Resolved production issues in API routing, context paths and UUID-based persistence

Projects

Automated AMI Patching Tool (Python, boto3, Trivy, SSM, SES, EventBridge, Jenkins) Veefin

- Launches a temporary EC2 instance from the golden AMI, scans with Trivy, patches through SSM, rescans, and bakes a date-stamped AMI
- Emails the manager before-and-after reports plus a delta through SES; scheduled with EventBridge and Jenkins

SpendSense: Personal Finance Platform (Solo; Angular, Spring Boot, MySQL) Full Stack

- Imports Indian bank statements (PDF, CSV, Excel; SBI, HDFC, ICICI, Axis, Kotak), detects duplicates, and matches internal transfers so self-transfers are not counted as spending
- Categorizes merchants with rules, user corrections and a confidence-gated ML model; includes budgets, goals and anomaly analytics
- Tool-calling assistant explains server-calculated numbers and asks for confirmation before changing any record; API secured with JWT and user-scoped queries

Indian Sign Language Detection (Published, ICCDS 2025) Python, ML

- ISL-to-text system with 98.4% gesture accuracy and 72.9% emotion accuracy; optimized for low-resource devices, cutting inference latency by 30%

Education

Dwarakadas J Sanghvi College of Engineering 2022 – 2026

B.Tech in Information Technology, CGPA 7.6/10

Utpal Sanghvi Global School 2020

Senior Secondary School Certification, 85%

Leadership & Research

DJ InIT.AI, Junior Research Lead Aug 24 - Present

- Organized 5+ workshops for 100+ students; contributed to NLP research accepted at ICCDS 2025
